

## IN THE SPECIFICATION

### PLEASE AMEND THE SPECIFICATION AS FOLLOWS:

[0044] In one embodiment, the display device 405 displays a virtual medical chart of a patient and accepts entry of physician's orders via a graphic user interface. In another embodiment, the display device 405 displays a graphical representation of patient information received from the medical devices 115a-c. In still another embodiment, the display device 405 displays decision-making options for health care personnel generated by the computing system 105 based on medical logic rules and the patient information.

Additionally, the bed system may enable application of virtual medical logic and rules analyses to assist patients and physicians in areas of medicine characterized by a rapid expansion of knowledge and research data exceeding the integrative capacity of some busy, practicing clinicians.
